---

To whom it may concern,

It is with much interest and excitement that I apply for this Summer Engineering Intern job. Not only am I confident that I would execute the role effectively and successfully, but I also believe that it would be an opportunity of a lifetime for me to further develop my knowledge in the software field as well as gaining valuable industry experience.

To shortly introduce myself, my name is Shawn Russell, and I am a sophomore at Louisiana State University in Baton Rouge, LA. At the university, not only am I focused on my studies, but I am also pro-actively involved in multiple extracurricular activities such as the National Society of Black Engineers, the Baptist Collegiate Ministry, and I also participate in exercise classes with colleagues.

On top of my education throughout the year, I make it a priority to set time aside to learn different languages of coding such as HTML, CSS, JavaScript, Java, and Python. I have incorporated some of these languages, using either NetBeans IDE or Eclipse IDE, into my personal project which was coding surveys for people about subjects that may peak their interests such as sports, television, or technology.

I look forward to the opportunity to meet with you all to discuss how I might become a beneficial member to your company. In the meantime, please feel free to contact me directly. Thank you for your time and consideration.

Sincerely,

Shawn Russell
